## Tenant Feature Administration

# Portal Admin – Toggling Features

The Interweave Admin Portal allows you to configure the features that are active and inactive on your Interweave Portal tenant.

When logged into the Admin Portal, simply select *Tenant Features* to view the toggleable features.

☰ Test Admin Portal

## Tenant Feature Administration

When you have accessed the *Tenant Features* section of the Admin Portal, you will see the list of features and panels that you are able to switch on and off.

To switch specific features on for your Portal tenant, simply click on the radio button entitled 'On'. Conversely, if you would like to switch certain features off, click the radio button entitled 'Off'.

Enable Manifest

Check to enable manifest for this tenant

### Active

	Off	On
Allergies Page	<input type="radio"/>	<input checked="" type="radio"/>
Appointments Page	<input type="radio"/>	<input checked="" type="radio"/>
Conditions Page	<input type="radio"/>	<input checked="" type="radio"/>
Detailed Table FHIR Button	<input checked="" type="radio"/>	<input type="radio"/>
Diagnostic Report Test Page	<input type="radio"/>	<input checked="" type="radio"/>
Documents Page	<input type="radio"/>	<input checked="" type="radio"/>
Encounters Page	<input type="radio"/>	<input checked="" type="radio"/>

# Portal Admin – Toggling Features

Features and panels associated with an overarching function or component will be nested beneath the parent component.

For example, in the image, you will see *V2 Summary Tab*. The options nested beneath *V2 Summary Tab* are the panels associated with that component. You can switch these panels on and off in the same way as we highlighted earlier.
